PROFESSIONAL SUMMARY

Recent Computer Science Engineering graduate with hands-on experience in Python, Java, Machine Learning, backend development, and cloud-native technologies. Strong foundation in DBMS, Operating Systems, Computer Networks, and System Design. Seeking Software Engineer roles to build scalable and intelligent systems.

EDUCATION

B.Tech – Computer Science and Engineering | Gokaraju Lailavathi Women's Engineering

College, Hyderabad

Nov 2022 – Jul 2026

CGPA: 7.66

Core Subjects: OS, DBMS, Computer Networks, System Design, Software Engineering

TECHNICAL SKILLS

Languages: Python, SQL, Java, C, C++, Bash/Shell Scripting

AI / ML: TensorFlow, Scikit-learn, Pandas, NumPy, Machine Learning, Deep Learning, NLP, Predictive Analytics

Backend / Web: Flask, Spring Boot, REST APIs, Spring Data JPA, HTML, CSS

DevOps & Cloud: Docker, Kubernetes (Minikube), GitHub Actions, ArgoCD, Terraform, AWS (EC2, S3, IAM), Docker Hub

Databases: PostgreSQL, Redis, MySQL

Monitoring: Prometheus, Grafana, Linux System Logs

Tools: Git, GitHub, Jenkins (Basics), Linux (Ubuntu), Windows

PROJECTS

AI Resume-JD Matcher using NLP | Python, Flask, Scikit-learn, Pandas

2026

- Built a resume screening system that compares resumes with job descriptions and generates a similarity score.
- Applied TF-IDF vectorization and cosine similarity to identify matching skills and keywords.
- Developed a Flask-based web interface for uploading resumes and job descriptions.
- Generated keyword gap analysis to highlight missing technical skills.
- Tech Stack: Python, Flask, Scikit-learn, Pandas, NumPy, HTML, CSS.

Zero-Downtime Deployment Pipeline with Canary Releases | Kubernetes, Docker, GitHub Actions, Terraform

2025

- Implemented canary deployments on a local Kubernetes cluster using Minikube.

- Built a CI/CD pipeline with GitHub Actions to automate testing and Docker image deployment.
- Configured Prometheus and Grafana dashboards for monitoring application metrics.
- Automated infrastructure setup using Terraform.
- Tech Stack: Kubernetes, Docker, GitHub Actions, Terraform, Prometheus, Grafana, Bash, Linux.

Distributed URL Shortener | Java, Spring Boot, Redis, PostgreSQL, Docker

2025

- Built a URL shortening service using Java, Spring Boot, Redis, and PostgreSQL.
- Developed REST APIs for URL creation and redirection.
- Implemented Redis caching to improve response time and reduce database load.
- Containerized services using Docker and Docker Compose.
- Added click analytics and rate limiting features.
- Tech Stack: Java, Spring Boot, Redis, PostgreSQL, Docker.

Diabetic Retinopathy Detection using Deep Learning | Python, TensorFlow

2025–2026

- Built a CNN-based model to detect diabetic retinopathy from retinal images.
- Performed image preprocessing, model training, and evaluation using TensorFlow.
- Applied deep learning techniques for medical image classification.
- Tech Stack: Python, TensorFlow, Pandas, NumPy.

CERTIFICATIONS

Docker and Kubernetes – Hands-on · Generative AI Studio – Google Cloud · Python Programming Certification · Java Programming

KEY HIGHLIGHTS

- Solved 300+ DSA problems on LeetCode — strong algorithmic foundation.
- Rare dual expertise in AI/ML and DevOps — suited for modern cloud-native and MLOps roles.
- Built AI systems applied to healthcare (retinopathy detection), operations (log anomaly detection), and HR automation (resume scoring).
- End-to-end project ownership: from model training to containerized deployment with monitoring.
- Strong CS fundamentals: OS, DBMS, Computer Networks, System Design.
